

NAME: Duke

GENDER: Male

DATE OF BIRTH: April 1, 2024

FUR LENGTH: Short

COLOR: Black and white

**Purrsonality:** Duke is your typical playful boy kitten but because of his history of being born and living outside, can be cautious if approached too quickly. Once he gets to know you, he is quick to trust and solicit pets. He likes hanging back and watching the other cats play and interact with humans before jumping in to play with the toys and other kittens.

**Children?** Duke should do well with respectful children of all ages.

**Othis cats?** Duke would do well with other cats and will need another playful (<12 months old) cat in his home. Although they are not bonded, Duke and Daisy were fostered together in North Carolina and get along well.

**Dogs?** Duke has never been tested with dogs but given his young age should be adaptable if the resident dogs are calm and friendly.

**Background:** Duke and his siblings were fostered by Beaufort Community Cats in North Carolina. He was the last kitten left after his littermates were adopted. Because of his age he needed to have another kitten to play with, so he was then fostered with Daisy, who was also a sole kitten that needed a buddy. He was transported to northern Virginia to go to Meows Corner.

**Medical or special care notes:** Duke has had vaccinations for rabies and distemper, is microchipped, and has been neutered. He has tested negative for FeLV and FIV. He is eating Fancy Feast classic pate and Purina One kibble.
