

NAME: Bixby and Finnegan

GENDER: Males

DATE OF BIRTH: February 1st, 2024

FUR LENGTH: Bixby (Medium) and Finnegan (Long)

COLOR: Bixby (Grey tabby) and Finnegan (Buff tabby)

Purrsonality: We are super snuggly, purry, and like to play roughly with each other as brothers tend to do!

Children: We need an active home and would do well with kids of all ages.

Other cats: We do well with other cats, and could go in a multi-cat home!

Dogs: We would probably do well with dogs, if appropriate slow introductions are utilized.

Background: These boys are brothers from Towson, Maryland! They were only 3 weeks old when 4Paws took them in. A young lady found them near her apartment and realized they needed medical intervention. They had colds and their eyes were infected. Unfortunately, Bixby's left eye did not develop correctly because of the infection. He has little vision in it and it is smaller than his right eye. He was assessed by a veterinary ophthalmologist and she said the eye is not painful or prone to infection now, so no additional medical treatments are needed.

Medical or special care notes: We have had our vaccinations, are microchipped, and have been neutered. We have tested negative for FeLV and FIV.
